| COURSE DESCRIPTION  |  |  |  |   |                    |     |  |
| Course objectives   | The aim of the subject is to educate the students how to take the samples of invertebrate fauna independently, how to make preparation of collected animals, how to determine and how to prepare the collection of invertebrates. Also, through the visiting the students will better understand the role of National Parks as well as the Nature parks.   |  |  |   |                    |     |  |
| Course enrolment requirements and entry competences required for the course                               | There are no entry competencies  |  |  |   |                    |     |  |
| Learning outcomes expected at the level of the course (4 to 10 learning outcomes)                         | <p>Student will be able to:</p> <ol style="list-style-type: none"> <li>1. explain zoogeographical characteristics of the mediterranean part of Croatia with the special accent on the Dinaric karst.</li> <li>2. To know the most important species from the biotopes above.</li> <li>3. To make the analyse of biology of some species (daily and seasonal dynamic of some populations)</li> <li>4. The adaptations of some species on climatic conditions (nanism)</li> <li>5. To recognise the main species of the Dinaric karst included the macroinvertebrates of the karst rivers</li> <li>6. How to collect the invertebrates using the different tools like tramps, net,... and how to use the determination keys</li> </ol> |  |  |   |                    |     |  |
| Course content broken down in detail by weekly class schedule (syllabus)                                  | <p>Exercises:</p> <ol style="list-style-type: none"> <li>1. 5 hours of excursion in NP Krka</li> <li>2. 3 hours of excursion in a Park Forrest Marjan</li> <li>3. 4 hours of excursion in the cave Vranjača-Dugopolje</li> <li>4. 3 hours of laboratory work</li> </ol>  |  |  |   |                    |     |  |
